The Speculative Element Sold to Take Advantage of Rise.

ST. PAUL WAS MARKED UP

This a Manipulative Move to Steady Market While Other Issues Were Being Disposed of-Bond Market Quiet and Irregular.

(By Associated Press.)

NEW YORK, July 9.—The selling of nocks to-day was obviously by the spec-NEW YORK, July 9.—The selling of stocks to-day was obviously by the speculative element which bought previously on the prospect of a rise, their motive being, of course, to take profits. Whether any actual developments bearing upon values were considered is not clear, but there were one or two considerations which must be construed against a further advance in prices. The marking up of St. Paul and New York Central, together with some of the coal stocks that were strong yesterday, is perhaps sufficiently explained as a measure or manipulation to faciliate the taking of profits elsewhere. Some of the high-priced industrials worked higher on what had the appearance of investment demand. The proposed suit to enjoin the payment of a dividend on United States Steel common came in for some vicorous denunciation as to its motives by officials of the corporation, and the advance in the stock was apparently intended as a notice to opponents of a purpose to protect the stock in the market. Of the factors making for the selling side, the continued heavy

movement of currency to Chicago was an important one. Including a deposit of \$30,000 at the sub-Treasury for telegraphic transfer to Chicago shipments by express, it is said that a million and a half went from here for that point to-day. The exigencies of the corner in the July option in corn are supposed to account for this heavy movement. The large commitments, believed to be held in the stock markets by the managers of the corner in corn, occasion some uneasiness over the possible results of the failure of a corn corner such as have accompanied many similar attempts in the past. The day's weather news was considered a bad showing also for crop prospects, too much rain being indicated. The fallure to advance the Louisville and Nashville dividend to a 6 per cent. basis was a disappointment to some speculators who had acted on "tips," but there was no general expectation of an increase. As was expected after yesterday's exchange market movement, no new engagements of gold exports were announced. The heavy disbursements are favoring the money market. The prolonged advance in Missouri Pacific made that stock particularly heavy, and the bears made a renewed attack, and also on Western Union and Sugar, the former on the termination of contracts with the Pennsylvania Railway, but the latter on the large capital embarking in opposition.

The bond market was quiet and irregular; total sales, our value, \$2.25,000. United States bonds unchanged on the latter of the latte

NEW YORK, July 9.—The cotton market opened barely steady, prices 2 points lower to 1 point higher; these prices being about the bottom for the day. The bear element was quick to put out additional short loans on the start, following weakness in the Liverpool market and reports of more or less general rains in the belt last night. Again the forecast pointed to showers and thunderstorms generally in the South, which led to believe that the drought was effectively broken in all districts. Nevertheless, as the session progressed private telegrams came to the front and told of critical conditions in parts of Alabama, Mississippi and Louisiana through continued absence of soaking rains.

and Louisiana through continued absence of soaking rains.

The Liverpool market rallied sharply before the close and New Orleans gave symptoms of underlying strength. The summer months shorts turned for cover as a matter of precaution, and shorts in the distant positions became rather uneasy. From S.28 August advanced steady to S.36, while the rise from the lowest on September was a matter of 10 points. Yet speculation was dull all day, with the market finally quiet and steady with prices net 2@6 points higher. Receipts were light, and the regulation phases of the situation were without notable change. Total sales were estimate, at about 50,000 bales.

NEW ORLEANS, LA., July 9.—COTTON—Spot cotton unchanged. In futures the opening of to-day was 2 points higher for January deliveries and 1@3 points lower for the nearer positions, but after the first call the market became gradually steady under the influence of active Liverpool market and upward tendency of prices at New York, and several months were bid up in a desultory manner. The close showed net gain of 6@7 points on all positions, except July, which was 1 point higher at 8.90.

COFFEE MARKET.

NEW YORK, July 9.—COFFEE—The market for coffee futures opened steady with prices unchanged to 3 points lower. Soon after the call the market turned easy under heavy selling by local importers, presumably as an offset to Brazilian purchasers, under which the whole list settled sharply. Within five minutes of the close some 5,000 bags was unhoaded by these traders, much of it going to "prominent street" and commission houses and foreign interests. Trading was the most active of recent times, reaching 63,000 bags. The market was fually easy, net 10@15 points lower. Spot Rio, steady; No. 7 invoice, 5½c.; mild, steady; Cordova, S@11½c.

# UPS AND DOWNS OF THE MARKET

Fluctuations Yesterday Were More Important.

THE LOUISVILLE DIVIDEND

The Regular Dividend Declared Wh e Stockholders Had Expected More, but the Price Held Up Well.

interesting than it has been for some time past. It was fairly active and fluctuations in some cases were important.
St. Paul, New York Central and Pennsylvania were all strong in the early trad-ing. Chesapeake and Ohio and Norfolk

sylvania were all strong in the early tracing. Chesapeake and Ohio and Norfolk and Western showed a tendency to rise. Colorado and Southern second preferred went above 45 on rather brisk trading, and the first preferred opened at 74, but the opening price was the highest.

THE GOULD STOCKS.

The Gould stocks were weak on the announcement of war between these roads and the Pennsylvania, and Westam Union was weak for the same reason.

LOUISVILLE DIVIDEND.

The Louisville and Nashville directors met at 2 o'clock and declared the regular semi-annual dividend, which was a great disappointment to the street. The recent range in stock was generally thought to foreshadow an increase to 3 per cent. It had been freely predicted, and was believed, that the stock would be put on a 6 per cent, basis, and for some time past the stock has been boomed on that report. Strangely enough, the price was not materially affected by the action of the directors. The stock sold off just before the directors met, but after the announcement was made there was a slight rally.

THE STEEL STOCKS.

However, the announcement was a signal for renewed selling throughout the entire list, and declines were general. The closing was about the lowest of the day, except for the steel issues, which were bid up sharply just before the close. This was due to the fact that two of the names used by the plaintiffs in their action before the New Jersey Court were found to be unauthorized by the parties themselves, who emphatically denied having any connection with the suit. Time money developed a decidedly stiffening tendency, with very little offered for any period. THE STEEL STOCKS.

Time money developed a decidedly stiffening tendency, with very little offered for any period.

IMMENSE PRODUCTION OF IRON.

"The Iron Ase" gives the total production of pig iron by our furnaces for the first five months of the current year as 7,289,000 gross tons. It also estimates the output of June at 1,500,000 tons, or 8,789,000 tons for the half year. Compared with the production for the half year of 1901 this indicates a gain of 1,200,000 tons. Furnace stocks of Iron were reduced 155,000 tons the first five months of the year. As exports of iron and steel are decreasing, while imports are showing a material gain, there is every indication that unless a reaction occurs the increase in consumption of iron in this country in 1902 will enual the remarkable increase of 1901, which was 3,300,000 tons larger than In 1909. Foreign advices show that the iron furnaces of Germany, England, and Belgium the largest of the European Iron producers, are again increasing their output of iron, generally, however, as a result of orders from this country.

WEST-END DIVIDEND.

The West-End Land Company, of Richmond, yesterday declared a dividend of \$1 a share on its stock, the amount to be paid out aggregating \$38,000.
